

Features:

Both caps are engraved with a generic numbering "1 in 500 pieces"

Ink-feed:

- Fountain pen: delivered with a specific-designed ink pump

Craftsmanship: Engraving, laquer, satin-brushing, polishing, diamond grinding, gemsetting, assembly.

Materials, Expertise & Technical sophistication:

Nib:

The nib is made in 18-carat gold and rhodium coated. It is engraved with the aesthetic codes of the collection. It is built and polished by hand to provide exquisite softness and comfort in writing.

Piston pump:

Each part of the pen's internal mechanism - piston pump, ink-feed system and nib - all benefit from the technical mastery and skills of Caran d'Ache craftsmen.

Ruby:

The piston pump is set with a ruby as in a winding crown. (0.04 carat)

Ring:

Pattern comprising 120 graduations representing half-seconds.

Cap:

Each 1010 Timekeeper writing instrument comes with 2 silver- and rhodium-plated caps, which can be changed just as you would change a watch strap.

Cages:

The interior cage represents a Haute Horlogerie dial.

INDEXES

The main hours appear in Roman numerals: III, VI, IX, XII.

HANDS

The dial bears three hands: Hours hand, Minutes hand, Seconds hand, also called large or centre seconds.

CLOUS DE PARIS guilloché: A play on contrasts between the satin-brushed finish of the chapter ring and the sparkling Clous de Paris hobnail pattern in the centre. The ring framing it features a ratcheted motif composed of 120 graduations representing half-seconds.

APERTURE INSPIRED BY MOON PHASES

Like a horological complication, a tiny dial aperture reveals the level of "Idyllic Blue" ink in the piston ink pump.

BRAND SIGNATURE: Caran d'Ache Genève signs the dial with a dedicated cartouche.

The design of the exterior cage is inspired by the glass of the watch.

All components are layered and assembled with millimetric precision inside the transparent cage in lightweight and resistant polished synthetic glass.

Presentation box

- A black-lacquered box resembling a watch presentation box.
 - Inside, two freely interchangeable caps and its inkwell
 - International Guarantee
 - Made of MDF wood - MDF for medium density fiberboard, the English name. Made of wood fibers and a synthetic binder.
- **Delivered with the case:**
- The brochure 1010 Timekeeper limited edition

Ink bottle:

- An exclusive ink bottle in raw glass, The inkwell has been specially crafted with its silver-plated, rhodium-coated cap like the watch crown, and finely adorned with the Caran d'Ache cartouche, 12 Roman numerals and three watch hands – all representing horological details recalling those of the edition itself.
- The “Idyllic Blue” ink is erasable.
